

Model	2501 - Bud, Round
Dimensions	
Seat Height	18.0
Seat Diameter	15.4
COM Yardage	Based on pattern repeats less than 5 in. x 5 in.
Unit	1.0

Options:
n/a

Seat The stool frame is constructed from 1" NAUF (no added urea-formaldehyde) particle board (Phase 2 CARB compliant) core, with the surface being made from layers of high quality fiber that have been spiral wound and laminated. Foam is glued to the surface of the frame to form the final shape; the top of the stool (seat) is made from 2" molded foam. The molded foam is formulated displacing 25% of the existing non-renewable petroleum material with a sustainable plant based substitute. The foam performs as regular based cut foam and provides a 3.0 to 3.2 PCF density with no changes to the physical properties, comfort, and longevity of the foam.

Glides Finished with durable injection molded hard plastic glides.

Load Test Weight load tested to 250 lbs
