 Healthcare - Parkland

PROJECT SPOTLIGHT

TORONTO HEALTH CARE CENTRE

Patient room features our Overbed Table, Bedside Cabinet, highback Midway & Urban guest chair.

One of Canada's largest regional acute care hospitals, the care centre recently opened its doors after having undergone a massive redevelopment program. The brand new hospital, which combined three separate care centers, put technology at the forefront of their modernization efforts and has become North America's first fully digital hospital.

Top: The Fracture Clinic Waiting Room features a combination of standard & Midsize Urban with plastic back and DuraSpec seat.
Bottom: Consultation Rooms outfitted with our standard & midsize Award Winning Urban.

The center employs altogether approximately 700 physicians, 3000 staff members and 400 volunteers who tend to just under 550 beds. Additionally, the hospital operates a major cancer treatment program and its affiliation with the University of Toronto and Queen's University have helped the hospital become Ontario's first Centre for Excellence for laparoscopic bariatric surgery, and Canada's first nocturnal dialysis program provider.

The newly opened state-of-the-art site features Spec's Calvin chairs in all public areas; Highback Midway seating, Overbed Tables and Bedside Cabinets in all patient rooms; and Urban and Snowball as complementary seating where needed.

furnished with Dignity2 in single
and two seat configurations
along with Heavy Duty Snowball 2
chairs, Disc base & Drum Tables.

Opposite: Public waiting room
features connected Calvin with
a steel frame and polyurethane
arms to promote infection control
& Urban at the registration desk.

The centre's behavioral health floor was furnished with Spec's weighted, tamper-proof designs. Our popular Dignity2 chair, Heavy Duty Snowball 2 and weighted Disc base and Drum Tables were used to ensure patient and staff safety.

The hospital specified several customized products to better suit their patients' needs. Among them is an armless Heavy Duty Calvin offering patients a more welcoming environment and a custom Highback Cooper Dwight with welded upholstered side panels to reduce ligature point. The Cooper Dwight also features completely concealed zippers that have been secured and pulls removed, with a fully welded steel weighted frame to reduce mobility. Polyurethane arms and the steel frame help control the spread of infection. Chairs feature tamper-proof fasteners, and springless seat cushion designs.

PROJECT SPOTLIGHT

PARKLAND HEALTH & HOSPITAL SYSTEM

Cooper Bala Benches

Parkland Health & Hospital System first opened its doors in 1894 and is now one of the largest public hospital systems in the United States, licensed for 861 adult patient beds and 107 neonatal patient beds and more than 10,000 employees. The hospital averages more than 1 million patient visits annually.

The new Parkland hospital will officially open its doors to the 2.1-million-square-foot facility to patients in late August 2015. The state-of-the-art 862-bed, 17-story structure will replace the aging Parkland Memorial Hospital that opened in 1954. The latest healing concepts, quality and safety design features have been incorporated into the all-digital acute-care facility making it a premier health care setting for Dallas County residents. At nearly twice the size of the current hospital, the new Parkland has been designed to meet the ever-changing needs of Dallas County – one of the largest, fastest-growing regions in the country.

A Glimpse of the Outdoor Wellness Garden

The Wall of Donors

A Sunlit Hallway

Hallway with Patient Rooms

The 862 single-patient rooms with private bathrooms and space for families and visitors offer just one example of the improvements for patients in the new hospital. The new campus also promotes an environment of healing by incorporating natural lighting and a wellness garden. One of the many distinct design features is the image of trees on the lobby glass. When seen closely, the trees are actually made of the names of the thousands of Dallas County citizens who support Parkland.

Unique Design

Final Touches

The Beautiful Sky Reflecting Facade of the Hospital

An Areal View of Parkland

Every aspect of the new Parkland hospital was thoughtfully planned to enhance the patient experience but still preserve safe, quality care. Parkland's leaders traveled across North America to visit other successful hospital building programs. What they learned from those experiences will give Parkland's patients the best medical facilities Dallas County has to offer.
