Cleaning and Maintenance

Clean all stains as quickly as possible and use the following cleaning procedures in order for best results.

- Step 1 Remove any excess spills with a damp cloth. Clean with a mild liquid soap and water mixture. Rinse with clean water and dry.
- Step 2 Use a straight application of concentrated cleaners such as Fantastik® or Formula 409®. Rinse with clean water. Wipe with clean cloth.
- Step 3 For more difficult stains, use a 1:10 mixture of household bleach and water (10% bleach, 90% water). Rinse with clean water and dry. Never use bleach at full strength to clean this material.

Virex® II 256 and Virox® 5 cleaners have been tested for use, diluted per manufacturers' instructions, on the following patterns: Connect, Kusari, Lava, Martini, Natural World, Olympus, Ripple, Sentry-HC, Tendril, Tessuto, and Wicker.

The material must be rinsed with clean water and dried with a clean cloth following cleaner application. Failure to rinse thoroughly with clean water and to pat dry may lead to cleaner build up and cause surface deterioration (cracking, blisters, peeling, discoloration, etc.). Indiscriminate use of strong cleaning products can severely damage or discolor this material.

The use of certain agents can be harmful to the surface appearance and lifespan of the material. Do not use cleaners marked "for hard surfaces only". Such use may cause surface deterioration.

To request additional cleaning and maintenance information, including verification of a disinfectant being tested for use with these materials, please contact CF Stinson at 800.841.6279 or visit cfstinson.com.

This information is not a guarantee and does not relieve the user from the responsibility of proper and safe use of the product and all cleaning agents. The use of certain agents can be harmful to the surface appearance and lifespan of the material. CF Stinson, its agents, and assigns assume no responsibility resulting from the use of such cleaning agents to the vinyl.

All patterns are 54" wide. Dye lots may vary slightly from samples shown.

All patterns meet or exceed the flammability requirements of California Technical Bulletin 117-2013, Section 1, NFPA 260 - Class 1 and UFAC - Class 1. Patterns have been tested for other flammability specifications; please visit cfstinson.com for comprehensive test results.

These patterns may contribute to compliance with California Technical Bulletin 133 when used in conjunction with other suitable components.

These patterns meet or exceed these ACT Performance standards for upholstery: 

*These patterns are GreenGuard Indoor Air Quality Certified.
