

Model: Askew

Base - ASK The Askew base is constructed by fully welding three 1" x 3" 14ga. steel tubes and a laser cut foot in an "O" shape pattern. The top of the base has 4 steel plates welded to it which bolt to steel structures that screw into the top. Two inserts are welded to the bottom of each leg and tapped for an adjustable leveler. Welds on the base are polished on both the front and back face of the joint. The base stretcher is made from 2" x 2" 14ga. tube and is mechanically fastened between the two Askew bases during install.

Tops

Laminate Constructed of 1" NAUF (no added urea-formaldehyde) particle board (Phase 2 TSCA compliant) core, covered and bonded with a water-based glue to a 1/16" high-pressure plastic laminate sheet on top and a plastic laminate backing sheet below for a sandwich top thickness of 1 1/8". The core is manufactured with 100% recycled material and is manufactured inside a FSC Certified manufacturing facility. The top density is 39 pounds per cu. ft. The top edge is routed to accept our PVC molding (Flat, Rigid) to match or accent the top, or self edge and further bonded in place with a water based

Veneer Veneer tables are offered constructed of 1" NAUF (no added urea-formaldehyde) particle board (Phase 2 CARB compliant) core, covered and bonded with a water-based glue to a 1/32" hand laid up flat cut veneer on top and bottom for a sandwich top thickness of 1 1/16". Veneers are selected with careful attention to grain matching and symmetry. The table edge is finished with one of several hardwood edge profiles.

Edges

SE See Laminate above

2MM 2MM edges are made from pellet material that is melted and extruded through a die-head profile. The edge is adhered to the core material and trimmed into place with a state of the art edge bander, resulting in a virtually pick proof edge. 2MM BIO EDGE has a bio-based content of 88% that is made from rapidly renewable corn. The portion of the corn used is a waste byproduct and therefore not taken from food stock. Contains no hazardous chemicals and emits no toxic VOC's and is recyclable. 2mm Bio edge has the impact durability of PVC with a profile similar to self edge. Available in 38 solid colors. 2MM PVC EDGE is a polyvinyl chloride extruded plastic edge with a profile similar to self edge. Available in wood grain to match 9 standard stains.

Hardwood Spec hardwood edges are individually segmented, glued, using water based glues, and then clamped to the edges of the tables to assure 100% surface coverage of the glue both on the tabletop and the hardwood edge. After clamping to ensure a tight and permanent bond, the edges are then machined and hand-planed to match the exact thickness of the tabletop. All corners are mitered then pencil radiused before being sealed, stained and lacquered.
