Dimensions

Seat Height	17.25	Depth	26.00
Seat Width	23.00		
Overall Height	29.50		

Weight (lbs)

Chair	26
-------	----

Options:

Wall saving	No
Connected	Yes
CAL 133	Standard
Arms	No
Glides	Yes
Weighted	Yes

Construction

One piece rotationally molded high impact Polyethylene (LDPE) with ultraviolet light stabilizers. Along with lightly textured surface, the seat portion features a subtle hand grip on each side for easier grip and relocation. A 3" opening at the bottom of the unit is used for ballasting the chair. Up to 135 lbs of additional weight (play sand) can be added on site for an approximately 160 lbs weighted chair. 4 11/16" OD ABS spun-in cap is used to close the opening, and it is recommended that it be sealed using tamper proof drill screws.

Glides (Optional)

Non-removable 1 1/8" steel levellers with a 1/4- 20 steel stem.

Ganging Bracket (Optional)

1/4" thick bent steel sheet with rounded corners and no sharp edges. Uses two 1/4" #20 bolts.
