 Call Factory for more information.

**Construction - With Arms**

One piece rotationally molded highly durable Polyethylene (LDPE) with ultraviolet light stabilizers. Along with lightly textured surface, the arm portion features a subtle hand grip on each side for easier grip and relocation. A 3" opening at the bottom of the unit is used for ballasting the chair. 4-11/16" OD spun-in cap is used to close the opening, and it is to be sealed using two tamper proof drill screws, locking it in place. Hardi is CAL 133 compliant as standard.

**Glides (Optional)**

Nickel-plated non-removable 1" nylon levellers with a 5/16-18 steel stem.

**Ganging Bracket (Optional)**

Two 11 gauge stainless steel brackets. The chair must have levellers to be able to be ganged.

**Floor Mounting (Optional)**

Four 11 gauge stainless steel brackets. The chair must have levellers to be floor mounted.
