Durability that Can't Be Beat

Made from rotationally molded polyethylene, the award-winning Hardi Series is virtually indestructible. The one-piece chair is extremely robust—and it's a breeze to clean. Available with or without arms as either a lounge chair or a dining chair, the Hardi Series also comes in rocker and stool designs, giving specifiers the opportunity to bring Spec into even more Behavioral Health applications.

Hardi Features

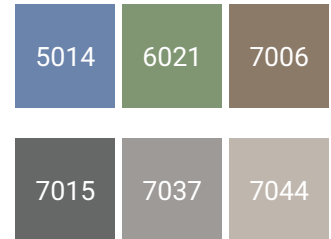

Hardi sits close to the ground. Nylon glides are available as an option to prevent marring. Optional ganging brackets can help users connect chairs specified with glides.

Hand grips make it easy to move the chair while seated.

Up to 132 lbs of play sand can be added to the chairs (44 lbs to the stool) through the 3" opening. The threaded cap is then secured with tamper-proof hardware.

Hardi Finishes

Choose from six colors that match our Spectone RAL offering to create a welcoming environment.
